High level goals

Users create and customize their profiles.
Users can log visits to cafes with diverse info. (Time, images, tags, drink, description)
Users can browse cafes on a map near them (Present other user visits and cafe info)
Users can browse cafes by name and specific tags in a list/grid view

User stories for release:

Sprint 1

- Login page
    - As a user, I want to be able to make an account and sign in so that I can review cafes. (4)
- Home page UI
    - As a user, I want to easily navigate around the home screen so that I can access the features available to me, such as cafe suggestions, without hassle. (3)
- Map page
    - As a user of the app, I want to view cafes as pins on the embedded map so I can get an easy overview of cafes in specific areas. (3)
- Cafe card/page
    - As a user, I want to be able to click on a card or pin of a cafe and see its title, hours, and other information (4)
- Cafe information
    - As a user of the app, I want to be able to see a cafe's information such as name, hours, and others (5)

Sprint 2

- Review page UI
    - As a user, I want to be able to easily write a review so that I can quickly share my feedback without being overwhelmed. (4)
- Cafe backend

- As a user, I want to be able to browse data about cafes such as name and hours (8)

Sprint 3
- Allow users to write a review
  - As a user, I want to be able to log my visits to cafes and include specific information about each (4)
- Allow users to browse reviews on cafes
  - As a user, I want to be able to see other peoples cafe visits and what they liked / disliked about them (5)
- Customize profiles
  - As a user, I want to be able to customize my profile with my favorite cafes, other information, images, and themes (5)
- Create lists of cafes
  - As a user, I want to be able to curate lists of cafes in specific areas or arbitrary groupings (6)

Sprint 4
- Viewing others profiles
  - As a user, I want to be able to view all reviews and lists made by a specific person on their profile page (5)
- Strong search feature
  - As a user, I want to be able to search for cafes by name or specific tags (4)
  - As a user, I want to be able to search for cafes by general location (6)

Sanity check

Aside from our first sprint, we have 4 user stories all around similar difficulty scheduled out. This would leave one person to take on unexpected challenges and infrastructure for each sprint. Similarly, it would leave us not completely occupied so there is flexibility depending on our schedules

Backlog
- Owner edit access to cafe view
  - As an owner of a cafe, I want to be able to edit information about the cafe as an admin
- Social aspects
  - As a visitor of a cafe, I want to be able to coordinate my visits with other users from the app
  - As a user of the app, I want to be able to follow other users so there reviews are suggested to me
- Co-visit cafes
  - As a user, I want to be able to include friends I visit cafes with on our logs, connect our logs together if we went together (4)
